PHARMACIES

RETAIL STORES

The Cashmatic Advanced automatic cash drawer is the fastest, most compact, robust cash machine and change dispenser.

It can be integrated into any cash desk and interfaces effectively with all the most commonly used management software. Ideal for handling large volumes of cash and is designed to withstand a continuous workload.

It permits unlimited autonomy with devices for recycling banknotes and coins and a high-performance cashbox. It optimises cash point management times, automatically giving change and eliminating the operations involved in counting cash when opening and closing the cash desk for easy shift turnovers and evening closing operations.

It improves in-store hygiene in compliance with European H.A.C.C.P. regulations. An automatic cashbox with a steel frame guarantees a high level of security against robbery and burglary.

The most robust and effective solution for continuous cash flows.

Integratable into the cash desk or custom furnishing solution.

Can handle all banknotes and coins (from 500 Euros to 1 Cent).

Eliminates the possibility of error giving change and cash losses, relieving the operator of direct responsibility for handling cash.

Permits **unlimited autonomy** with no need to top up cash daily.

Speeds up counting of money, so that no time is wasted during shift changes. Provides a balance with just one click.

Facilitates closing of the cash desk. With just one click you can empty the drawer or leave funds for use the next day.

Provides real-time email notification when the drawer is removed or funds are taken from it.

CEB (Central European Bank) certified for secure counterfeit detection.

Improves **hygiene** at the point of sale, eliminating contact with cash in compliance with European H.A.C.C.P. regulations.

Guarantees a high level of **security** against burglary and theft with its 2 mm steel frame.

Interfaces effectively with all the most commonly used management software, internet browsers and platforms.
