The body is constructed from galvanised steel plate with a solid steel door 4mm thick. The highly secure electronic lock which is fitted to all models is simple to operate and can be programmed with an easy to remember personal code, giving many millions of potential combinations.

The electronic combination has an advanced, built in anti tamper lockout system which freezes the lock once the incorrect combination has been entered 3 times consecutively.

The Phoenix SS0700 series is suitable for fixing to the floor or wall. Its easy to install basefixing system gives added strength and security when fixed to any concrete, wood or asphalt floor or when bolted to a wall.

● **Dimensions stated as:**

- A External height x width x depth
- B Internal height x width x depth
- C Door swing
- D Weight
- E Capacity

● **Phoenix SS0701**

- A 170mm x 230mm x 170mm
